

To: Adel Algarmani – Managing Director (Algarmani Trading Corp.)

I would like to express my appreciation for the support you have given Canadian Nexen Petroleum Yemen since the commissioning of the CPF Power Plant Expansion project starting in 2002. Your company has provided OEM-verified technical assistance to our ABB and Napier Turbocharger overhaul programme and to machining operations within our MAN RK270 engine overhaul programme. Your company has also been proactive in maintaining a partnership in the provision of spare parts for these engines and turbochargers to the extent of holding stock in country at your own expense, awaiting our orders. The Nexen Maintenance department has recently been recognized for the improvement in availability of these units. This could not have been achieved without the help and upbeat approach of the supplier of our spare parts.

I look forward to this partnership continuing to the benefit of both parties.

Peter Wilkinson
